Weekly Check In 01

_____

Fady:
- **Activities:**
  Started outlining the user flow (phishing email → fake form → IT alert)
  Drafted the HTML for the fake password change form
  Started setting up the Flask project structure

- **Next Steps:**
  Complete the front-end pages (form + success page)
  Connect front-end to the backend email alert system

Steve:
- **Activities:**
  Researched QR code tools and flyer design best practices

- **Next Steps:**
  Generate a test QR code and ensure it redirects properly to the fake site
  Finalize phishing link strategy and placement

Keyu:
- **Activities:**
  Drafted content for the phishing email and flyer messaging
  Began researching ethical considerations and how to notify IT after simulation

- **Next Steps:**
  Coordinate with the IT department to request permission and outline the plan
  Refine flyer and email drafts for distribution

William:
- **Activities:**
  Began developing the Python script to send emails to IT on form submission

- **Next Steps:**
  Set up a GitHub Action to auto-run tests or deploy the site
  Ensure no password data is stored and email alerts function correctly
